

polarjet[®] 6000

The power machine among dry ice cleaning equipment. The most powerful unit of all polarjet devices.

The polarjet 6000 beats them all. It is the ideal choice for the sophisticated industrial customer. The housing is made of high-quality stainless steel. Equipped with all well-proven elements of the polarjet 2000/4000, it outperforms the other polarjet devices. Thanks to its newly developed blasting gun the polarjet 6000 accelerates the standard pellets even faster resulting in an optimal cleaning performance. Equipped with a claw coupling connection, the unit operates fully pneumatic. The pellet consumption can be adjusted on the blasting gun.

The polarjet universe

The devices differ in air and pellet consumption. Basically, the cleaning or removal rate is proportional to the air and pellet consumption. Each device operates fully pneumatic and without electricity.

Rule of thumb:

The polarjet devices 1600 and 2000 are used to remove dirt that can be scraped off with your fingernail.

The polarjet 6000 is suitable for dirt that can be scraped off using the spatula. The performance of the polarjet devices 1600 plus and 4000 lies inbetween.

polarjet[®] 6000

Technical data

General features	Housing made of stainless steel and plastic
Frame and housing Exterior dimensions	Mobile unit on 4 wheels (front wheels rotatable) 480 x 700 x 1160 mm
Container capacity	10 kg dry ice pellets
Compressed-air supply	> 5000 l/min (6 bar) 4 - 10 bar dehumidified air (refrigerant type dryer)
Weight with empty funnel	49 kg
Compressed-air setting display	Regulator on equipment, Compressed-air display in bar
Dry ice consumption	15-60 kg/h
Standard content	Blasting gun with LED light and working hose, standardized connection coupling (cam coupling) with 10 meter compressed-air hose, ice shovel, 5 meter grounding cable with clamps, safety instructions, instruction manual
Optional	See accessories

excl.VAT **Price CHF 13'800.-** EUR 12'250.-
